Summary

B.Tech CSE (AI & ML) student who thinks in systems and writes in clarity. Experienced building full-stack and ML-powered products end to end – from talking to users and scoping requirements through to shipping and documenting the solution. Comfortable reading data, writing structured docs, and working with ambiguity. Interested in software that operates at the edge – where decisions need to be fast, reliable, and explainable.

Experience

NIT Trichy

Research Intern – Machine Learning

Trichy, India

May 2024 – July 2024

- Scoped and owned a research problem in anomaly detection – defined success criteria upfront, built the end-to-end pipeline independently, and iterated based on precision and recall benchmarks before presenting findings to senior researchers.
- Produced structured technical documentation at each stage – covering methodology, data decisions, and evaluation results – written clearly enough for researchers outside the immediate team to follow and reproduce.
- Demonstrated ownership and adaptability in an ambiguous research environment with shifting requirements and no predefined solution path.

Eduskill, AICTE

AI/ML Virtual Intern

Remote

Jan 2024 – March 2024

- Analysed structured datasets using Python and SQL to identify patterns and surface actionable findings; documented automation workflows clearly for non-technical team members.
- Practised translating raw data observations into structured written summaries – a direct parallel to translating fleet logs and support tickets into product insights.

Projects

Agriculture Procurement Platform | *React, Python, MySQL, REST APIs*

- Started with field-level conversations with farmers and buyers to understand the actual problem before writing a line of code – identified that lack of direct market access was the core pain point, not a technology gap.
- Scoped and documented requirements for each user type, built REST APIs and a MySQL database layer, and designed a React frontend serving both web and USSD interfaces – two completely different surfaces from one backend.

MyCrop – Crop Disease Prediction | *React, FastAPI, Python, TensorFlow, MySQL, Docker, GCP*

- Owned the product end to end – defined the user flow, trained the CNN model, built the FastAPI backend and React frontend, containerised with Docker, and deployed to GCP Cloud Run with a GitHub Actions CI/CD pipeline.
- Built a logging and monitoring layer to track prediction usage and surface anomalies – analogous to monitoring fleet software dashboards and feeding field patterns back to engineering.

PS-GRNN Digital Immune System | *Python, GRNN, MongoDB* | *Published – IEEE ICICC*

- Translated a network security problem into a structured ML solution – defined the detection criteria, engineered features from raw traffic data, and evaluated using precision and recall benchmarks.
- Documented the methodology and results in a format suitable for external peer review; published at an IEEE international conference.

Education

SRM Institute of Science and Technology

B.Tech in Computer Science & Engineering (AI & Machine Learning) *CGPA: 9.26/10.0*

Tiruchirappalli, India

2023 – 2027

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Software Engineering, OOP, Database Management Systems, Operating Systems.

Skills & Certifications

Programming & Data: Python, SQL, Java, C, Pandas, NumPy

Product & Docs: Requirements Scoping, Technical Documentation, Data Analysis, API Understanding, System Design Basics

ML & AI: TensorFlow, Scikit-learn, Anomaly Detection, Feature Engineering, Predictive Modelling, Statistical Analysis

Web & Backend: React, FastAPI, REST APIs, MySQL, MongoDB

DevOps & Cloud: Docker, GitHub Actions CI/CD, GCP Cloud Run, Git

Soft Skills: Systems Thinking, Clear Written Communication, Analytical Reasoning, Ownership, Adaptability

Certifications & Achievements:

- IEEE Research Publication – ICICC
PS-GRNN Digital Immune System
- NPTEL Elite – Cloud Computing
- Machine Learning Specialization
Stanford University (Coursera)
- Database Foundations – Meta
- Hands on Approach on AI Tools – IIT Kharagpur(TCS ION)
